

Overview

This app was built for an apprenticeship with Fetch Rewards. What it does is fetch a list of data from a webpage, sort the data, and display it to the user in an easy to read format.

This app was tested on a Pixel 3 emulator and a Razer Phone 2.

Installation Instructions

Copy .apk file onto android device

On device's file explorer, navigate to the folder where the .apk was copied

Tap the .apk file to install

Since Play Protect doesn't recognize the app, android won't want it installed. At each step, select the option to install anyway.

Open "Fetch Rewards Apprenticeship App"

Press "Retrieve and Display Data" button
